Which parts of a crocodile can you see?

What can you see in this picture?

How much do you know about crocodiles?

1 Do crocodiles live in the sea?
2 Why are a crocodile's eyes on the top of its head?
3 Crocodiles swim. Can they run too?
4 Do crocodiles have more teeth than we do?
5 What do crocodiles eat?
6 For how many weeks is a baby crocodile inside its egg?

Now read and see how many questions you answered correctly.

1 Crocodiles eat fish, birds, animals and sometimes they eat people too! They do not eat grass or plants.

2 A crocodile has a long body and mouth and a long tail. A crocodile has short legs. But be careful because they can swim and they can run too!

3 A mother crocodile sits on her eggs for about 12 weeks. The eggs crack open and the mother carries her baby crocodiles to the river.

4 You can find crocodiles in many parts of the world. Some crocodiles only live in rivers but some crocodiles can live in the sea too.

5 When crocodiles swim they can see. Their mouths are under the water but their eyes are above the water. A crocodile's eyes are on the top of its head.

6 Look inside a crocodile's mouth and you can find a lot of teeth! They can have between 60 and 80 teeth. People have about 30 teeth.
